Objective

I am a passionate Computer Science undergraduate with experience in web development, building scalable and user-friendly applications. Motivated to create impactful web solutions while continuing to grow and learn new technologies.

Education

Bachelor of Technology in Computer Science & Engineering | 2024 – Present

Gyanmanjari Institute of Technology (GMIU)

- Current Semester: 6th
- Current CGPA: **7.5**

Diploma in Computer Engineering | 2021 – 2024

Gyanmanjari Diploma Engineering College (GTU)

- Result: **8.02 CGPA**

Secondary School Certificate (SSC) | Completed June 2021

KPES School

- Result: **Overall B Grade**

Work Experience & Internships

Python Developer Intern

Vault of Codes (in partnership with Google) | 01 July 2025 – 01 August 2025

- Developed and optimized Python scripts, leveraging best practices for clean code structure and data manipulation.
- Collaborated on project tasks aligned with Google partner technical development guidelines.

Flutter Development Intern

QuickSend | *02 June 2025 – 20 June 2025*

- Collaborated on cross-platform mobile application development using the Flutter framework and Dart programming language.
- Assisted in implementing responsive UI components and state management features.

Web Development Intern (Advanced PHP)

Parshiv TechHub | *20 December 2024 – 05 January 2025*

- Engineered backend web applications using Advanced PHP, focusing on secure database interactions via PHP Data Objects (PDO).
- Optimized relational database queries and implemented structural data management practices.

Web Development Intern (Full-Stack)

Digiq Technology | *27 July 2023 – 06 November 2023*

- Built and deployed responsive web interfaces using HTML5, CSS3, and JavaScript.
- Developed server-side application logic using core PHP integrated with standard relational databases.

Python Developer Intern (Django)

Baronial Talent Builders | *17 September 2022 – 01 October 2022*

- Introduced to server-side web frameworks by building basic web applications using Django.

Configured routing, views, and built-in SQLite database architectures.

Skills

Programming & Scripting Languages	Python, Java, C, C++, PHP, HTML, CSS, JS
Methodologies	RESTful API, Machine Learning, Deep Learning
Web Technologies	HTML, CSS, JS, JSON
Data & Database Technologies	MongoDB (NoSQL), RDBMS (MySQL/PostgreSQL, PDO connection handling), DBMS Principles
Frameworks & Libraries	Laravel, Pandas, NumPy, Matplotlib, Seaborn
Version Control	Git, GitHub
Tools	VS Code, CUDA, NVIDIA Toolkit

Academic Projects

Rapid Respiro AI: Pneumonia Detection System | Python, PyTorch, CUDA, HTML/CSS

- Role in project: Leader
- Developed a high-performance medical diagnostic tool using an ensemble deep learning architecture (DenseNet121 and ResNet34) to identify pneumonia from chest X-rays with 89.9% accuracy.
- Leveraged NVIDIA CUDA computing to accelerate model training and inference, significantly reducing diagnostic processing time.
- Implemented Grad-CAM heatmaps and ROI bounding boxes to provide visual interpretability for clinical decision support.
- Designed a clean, responsive web interface for healthcare professionals to upload images and view real-time confidence scores and diagnostic reports.

Shopping Portal: E-Commerce Web Application | PHP, MySQL, JavaScript, Bootstrap

- Developed a dynamic, full-stack e-commerce portal featuring a product catalog, secure user authentication, and a multi-level shopping cart system.
- Architected an RDBMS-based database in MySQL to manage complex relational data for categories, products, user orders, and Wishlist's.
- Built a comprehensive Admin Dashboard to streamline inventory management, allowing for real-time adding, updating, and deleting of products and tracking of customer orders.
- Implemented frontend validation and a responsive UI using Bootstrap and JavaScript, ensuring a seamless shopping experience across mobile and desktop devices.

Certifications & Self Learned

Oracle University

- Generative AI Professional
- AI Foundation Associate

Reliance Foundation

- Blockchain Technology

Apna College

- JavaScript (Basic)
- CSS (Basic)
